

Product / Service Information

THIS IS US

AZIMUTH RADIO TECHNOLOGIES is a privately owned company established in 2020, headquartered in the beautiful bustling blue Mediterranean shipping city of Limassol, Cyprus whilst enjoying a truly global scope and supply of our services. We acknowledge and understand the concerns and demands of the modern shipowners and operators to ensure the safe and fully functional needs of their seagoing transport and the passage on which they embark to give accurate data and mitigate potential risk.

AZIMUTH is dedicated to delivering optimal technologically innovative and sustainable solutions for faster and more efficient communication and navigation for seagoing transportation.

We are a preferred maritime choice with high core values and a stimulus for our people, global maritime industry as a responsible, accountable, ethical, respected, and effective service provider promoting integrity and openness.

WHAT WE DO

We deliver superior friendly and empathetic services for critical equipment onboard your floating asset always in compliance with national and international regulations and standards in accordance with our activities.

We are visionary, innovative, adaptable and take pride in our success rate.

We listen to you! We go above and beyond your requirements and expectations bringing you the AZIMUTH Seal of Approval.

Our technicians are highly skilled, trained, qualified, competent and authorised by major brands for installations and execute services on shipboard communication equipment as well as navigational aids. Retrofitting and maintenance of both communication and navigational aids also falls within the scope of our organisations range. We have access and confidently supply an extensive selection of new and reconditioned parts with a broad network of accredited companies with whom we enjoy excellent collaboration. We deliver always keeping your OPEX in mind whilst safeguarding the bridge resource management of your fleet.
