Safeguarding Navigational Integrity

# ABOUT US

---

---

Privately owned company established in 2020

---

Headquartered in Limassol, Cyprus, with offices in Hamburg, Germany.

---

The provision of onboard and shore based cybersecurity, IT network architecture and connectivity services accommodating data accuracy, protection and risk mitigation.

---

Mapping out best business practice ensuring safe, and secure uninterrupted operations.

---

Creative, innovative and proactive in delivering results beyond customer expectations.

# AZIMUTH MISSION, VISION & VALUES

---

Dedicated to delivering optimal technologically innovative and sustainable solutions for faster, safer, secure and more efficient communication and navigation for seagoing transportation.

To make Azimuth the preferred maritime choice within the scope of product and services it renders.

Be a stimulus for our people, the maritime industry as a responsible, accountable, ethical, respected and effective service provider promoting integrity and openness.

# QUALIFIED, COMPETENT & AUTHORISED

5 critical functional elements that create the backbone of a sound cyber risk management programme on which our services are based.

- MutliART SecuBox
- ARTLink
- CyberSec
- Disaster Planning
- WIFI & LITE Solution
- Detect & Protect
- Next Gen. Antivirus
- Deployment & Migration
- Disaster Recovery
- Data Transfer
- Secure Firewall
- IT & Cloud Management
- Network Architecture
- Secure Remote IT Support
- Real-Time OT & IT Security

# REAL TIME IT & OT SECURITY

Inventory and Monitoring  
Asset Segmentation Vulnerability &  
Threat Management

From Virtual Private Networking to Intrusion  
Detection, Firewall, Web filtering, 2FA

Detect and Protect in Realtime  
Machine Learning USB Protection

Realtime monitoring and alerting system  
Centralized log management system Security  
Incident Response Platform

Instant Backup, Snapshots, easy Cloud Recovery,  
Locally, Remotely or via Scripts

# #Nextcloud

## A safe place for your data

---

- Secure Data Transfer between your Vessel and Office with WAN Optimization
- GDPR compliance reliability where you know your data is safe on our ISO 27001 Certified Data Center

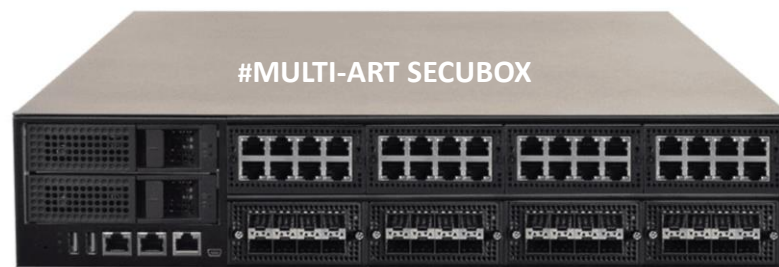

# Complete Manageable Solutions & Installations

---

- KA and KU band
- FX Solutions
- V60 V60KA
- GX100NX GX100NX HP
- GX60NX GX60 HP v85NX v100NX v130NX v150NX
- Iridium Certus Terminal C700

Protecting the integrity of unauthorized access, manipulation or disruption

Providing **solid investment protection** with the opportunity to act flexibly when choosing your application.

## HARDWARE

Fit for purpose design. The internal bus systems are designed for high data throughput, eg security solutions, as well as best VPN and encryption performance, allowing GPS position and tracking history, software management, statistical data and reporting tools.

## MULTIFUNCTIONAL SOLUTION

Enabling the hosting of multiple applications, add new Container or VM's with just one click.

Providing you  
with a Link to  
the World

- Advanced technology 4G/LTE equipment
- Range up to 100km from coast
- High Speed GB based on selected providers
- Two cellular modems and two redundant sim card slots. Up to 4 different cellular providers
- Dual-Band Wifi for the crew/passengers (simultaneous dual band wifi)
- Security Firewall embedded
- Failover embedded
- Web Application management
- Fleet Tracking – Built in GPS
- KPI reports software
- VPN embedded
- WLAN embedded
- Easy Operation
- Mobile Bandwidth Bonding
- Easy installation
